OOP | Learn CF in a Week

Object Oriented Programming is a set of concepts and techniques that make use of the "object" language construct, to write more reusable, maintainable, and organized code. Objects are implemented differently in every language; in ColdFusion, we have ColdFusion Components (CFCs). Using objects doesn't require OOP, and not every use of objects is OOP.

To go Object-Oriented or to not go Object-Oriented (OO) is still the source of some of the most heated discussions in the ColdFusion world. The simple truth is that the rest of the programming world had this fight 10 years ago—and OO won. As a result of the wider industry's move towards OO, the ColdFusion community has
